

LICENSE PLATE RECOGNITION TICKETING AND ID SYSTEMS

PRS3500 Series

GateSet PRS3500 License Plate Recognition provides state of the art vehicle access inspection with success rate of 98,2% in daylight and 99,2% in nighttime. The system is ideal for a broad range of use from high-speed, highway traffic inspection to parking lot management of facilities such as hospitals, business centers, residential buildings, government/military compounds and shopping malls. Advanced functions of PRS3500 Series includes extensive activity report for each recorded license plate along with assignment and warning for banned vehicles. System is designed to easily integrate with parking management/guidance and access control products such as ticketing systems and rising arm barriers.

License Plate Recognition Features

Camera Independent System

In terms of camera component, PRS3500 Series are brand or model independent. The system is compatible with all IP cameras which feature Real Time Streaming Protocol. In standard configuration, PRS3500 comes with 2MP Lite AI IR Vari-focal Bullet Network Camera.

Precise Plate Detection

PRS3500 Series provides one of the best plate recognition rates in the market with a success ratio of 98.2% accuracy in daylight and 99.2% at night.

Multi-functional Software

Web-based interface which comes with extensive features such as guest and personnel entry/exit data logging, audible and visual alarm for blacklisted persons; notification to facility personnel for white-listed guests.

Wide Usage Range

When integrated with UVS2000 System, a range of plate recognition up to 15 meters is available. In cases where PRS3500 System is used on the highways for various other purposes such as speed control, toll management and security check, recognition range can be extended up to 40 meters and the system can identify the license plate of vehicles traveling at a maximum speed of 200 km/h (requires additional hardware).
